Digital Literacy Assignment Report

Course: CSE0001 – Digital Literacy
Student Name: Devansh Varshney
Reg Id: 25BCE11127
Institution: Oriental Institute of Science and Technology, Bhopal

1. Introduction

Digital literacy has become an essential skill in modern education and professional environments. It refers to the ability to effectively use digital technologies to access, evaluate, create, and communicate information responsibly. These skills allow individuals to work productively with digital tools, collaborate online, and remain safe while using the internet. (Techopedia)

In today's technology-driven world, students regularly use digital platforms for learning, communication, and research. Therefore, understanding how to use digital tools effectively and safely is extremely important. Digital literacy includes knowledge of computer systems, online communication tools, cybersecurity practices, and professional digital presence.

The objective of this assignment is to develop practical digital skills by performing different tasks related to digital communication, online safety, collaboration platforms, and professional networking tools.

This repository contains all the completed tasks for the **Digital Literacy coursework**, including infographic creation, professional platform setup, coding practice, email etiquette, and cybercrime awareness.

2. Objectives of the Assignment

The main objectives of this assignment are:

- To understand the concept of digital literacy and its importance.
- To explore digital tools that improve productivity and learning.
- To develop a professional digital presence on platforms like GitHub and LinkedIn.
- To practice coding using online programming platforms.
- To learn proper email etiquette and responsible social media behavior.
- To raise awareness about cybercrime and online safety.

These objectives help students develop the skills necessary to operate effectively in a digital environment.

3. Task 1 – Digital Literacy Infographic

Overview

In this task, an infographic or visual slide was created using a design tool such as **Canva, Prezi, or Miro**. The purpose of this infographic was to visually explain key concepts related to digital literacy and make the information easy to understand for students.

Topics Covered

The infographic included at least three of the following topics:

- What digital literacy is
- Useful digital tools for students
- Safe internet practices
- Professional online presence
- Email etiquette

Explanation

Digital literacy refers to the ability to use digital technologies to locate information, evaluate sources, create digital content, and communicate effectively through online platforms. It also includes the ability to use technology responsibly and safely. (Techopedia)

Students rely on many digital tools such as Google Docs, GitHub, and online learning platforms to complete academic tasks and collaborate with others. In addition, safe internet practices such as creating strong passwords, avoiding suspicious links, and protecting personal data are essential for preventing cybercrime.

Maintaining a professional online presence is another important aspect of digital literacy. Platforms like LinkedIn and GitHub allow students to showcase their skills, projects, and achievements to potential employers.

The infographic was designed to summarize these concepts visually so that students can quickly understand the importance of digital literacy in academic and professional life.

4. Task 2 – Professional Platform Setup

Overview

This task involved creating or updating accounts on professional and academic platforms that are commonly used by students and professionals.

Platforms Used

The following platforms were created or updated:

- GitHub
- LinkedIn
- Kaggle / Stack Overflow

GitHub Profile

A GitHub profile README repository was created with the same name as the GitHub username. The profile includes the following details:

- Student name
- Branch and academic year
- Institution name
- A short description of learning goals

GitHub is widely used for software development collaboration and project sharing. It allows developers to maintain code repositories, collaborate on projects, and build a professional portfolio.

LinkedIn Profile

The LinkedIn profile was updated with the following information:

- Current degree program
- Institution name
- Expected graduation year

LinkedIn helps students build professional connections, discover internship opportunities, and present their achievements to recruiters.

5. Task 3 – Digital Platforms Practice

Part A – Coding Practice

For this task, a coding platform such as **HackerRank, CodeChef, or HackerEarth** was used to complete a beginner-level programming challenge.

The following steps were performed:

1. Created an account on the coding platform.
2. Selected a beginner-level programming challenge.
3. Successfully solved the challenge.
4. Captured a screenshot of the completed challenge and score or badge.
5. Uploaded the screenshot to the repository inside the folder **task-3-platforms**.

Practicing coding challenges helps students improve their programming skills and problem-solving abilities.

Part B – Google Workspace Collaboration

A **Google Form** was created to conduct a small quiz related to digital literacy awareness among students.

Form Requirements

- Exactly **5 questions**
- At least **one multiple-choice question**
- At least **one short answer question**

Purpose

The form was designed to:

- Test students' understanding of digital literacy concepts.
- Encourage awareness of online safety.
- Collect responses automatically through Google Sheets.

Screenshots of the Google Form and the linked response spreadsheet were added to the repository.

6. Task 4 – Email Etiquette and Social Media Responsibility

Part A – Professional Email Writing

Professional communication is an important digital skill. In this task, two formal emails were written.

Email 1 – Assignment Extension Request

A student wrote a professional email to a professor requesting an extension for an assignment submission deadline.

Email 2 – Internship Inquiry

A student wrote an email to a company internship coordinator expressing interest in a summer internship opportunity.

Email Structure

Both emails included:

- Clear subject line
- Professional greeting
- Well-structured message body
- Polite closing and signature

Learning proper email etiquette ensures that communication remains respectful, professional, and clear.

Part B – Social Media Do's and Don'ts

Responsible social media behavior is an important part of digital literacy. A checklist was created to guide students in maintaining a positive online presence.

Example Do's

- Share professional achievements.
- Protect personal information.
- Verify information before sharing.
- Maintain respectful communication.
- Use strong privacy settings.

Example Don'ts

- Do not share confidential information.
- Avoid posting offensive or harmful content.
- Do not engage in cyberbullying.
- Avoid spreading misinformation.
- Do not misuse others' digital content.

Practicing responsible social media behavior helps students maintain a positive digital reputation.

7. Task 5 – Cybercrime Awareness

Part A – Cybercrime Case Study

A case study was written about a cybercrime incident such as **UPI fraud, phishing, identity theft, cyberbullying, or ransomware**.

The case study described:

- What the cybercrime is
- How it happens step-by-step
- Who is usually targeted
- The consequences for victims

Cybercrime often involves attackers tricking users into revealing sensitive information or transferring money. Such crimes can lead to financial loss, identity theft, and emotional distress.

Part B – Stay Safe Online Checklist

A checklist of safety tips was created to help students protect themselves from cyber threats.

Key Safety Tips

- Use strong passwords.
- Enable two-factor authentication.
- Do not share OTP or banking details.
- Avoid clicking unknown links.
- Verify websites before entering personal data.
- Use secure networks.
- Keep devices updated.
- Be cautious of suspicious messages.

Reporting Cybercrime

Students should report cybercrime through the following official channels:

- **National Cyber Crime Portal:** https://cybercrime.gov.in
- **Cyber Crime Helpline:** 1930

These platforms help victims report cybercrime incidents and seek assistance from authorities.

8. Learning Outcomes

Through this assignment, the following skills were developed:

- Understanding the importance of digital literacy.
- Using digital tools for productivity and collaboration.
- Building a professional online presence.
- Practicing coding on online platforms.
- Writing professional emails.
- Learning safe internet practices.
- Developing awareness about cybercrime and online security.

9. Conclusion

Digital literacy is a fundamental skill in the modern world. It enables students to effectively use technology for learning, communication, and professional development. By completing the tasks in this assignment, students gained practical experience in using digital platforms, practicing professional communication, and understanding online safety.

Developing strong digital literacy skills helps individuals navigate the digital world responsibly, protect themselves from cyber threats, and build a strong professional presence online.
